The Board stressed the need to show value to farmers for the assessments collected. Any increase should be justified by additional services provided. The large increase planned for our project budget has been targeted for items such as legal research on flow claims, acquiring water rights for the WID, and providing technical information for support of water rights claims. A letter to all WID parcel owners should make the purpose of the increase clear. It should explain what we have done and what the increase will allow us to do.

Andy moved to set the rate at \$10/acre, Al seconded, motion was approved unanimously.
